Cyber Security, Soc Analyst and Network Engineer

SOC Analyst with hands-on experience in security monitoring, SIEM tools, vulnerability assessment, and network traffic analysis. Strong foundation in cybersecurity operations, incident response, and digital forensics. Certified in CEH and CCNA with practical exposure to Splunk, Wireshark, and Nessus. Experience with desktop network monitoring and packet analysis tools. Highly skilled in managing information risk – designing security strategy and **security solutions** with acute understanding of **governance, risk, and compliance**.

COMPETENCY COVERS

- Vulnerability Assessment	- Security Monitoring	- Cyber Security	- Threat Detection
- Forensic Investigation	- Network Security	- Ethical Hacking	- SIEM (Splunk)
- Log Analysis	- Network Engineering	- Firewall & IDS/IPS	- Incident Response

Security Monitoring: Continuous monitoring of security events across network devices, servers, endpoints, and applications to identify suspicious or malicious activities. Includes analyzing alerts, correlating logs, detecting anomalies, and escalating potential incidents based on severity.

SIEM (Splunk): Using Security Information and Event Management (SIEM) tools like Splunk to collect, normalize, and correlate logs from multiple sources. Creating dashboards, running search queries, identifying Indicators of Compromise (IOCs), and performing alert triage for faster incident detection and response.

Log Analysis: Analyzing system logs, firewall logs, authentication logs, and application logs to detect unusual patterns such as brute-force attempts, privilege escalation malware execution, or unauthorized access.

Threat Detection: Identifying known and unknown threats using signature-based detection, behavioral analysis, and anomaly detection techniques. Recognizing attack patterns like phishing, ransomware, lateral movement, and insider threats.

ACADEMIC

B.E. Computer science and engineering- Mahendra college of engineering || 2026 || 7.5 CGPA

CERTIFICATE & TRAINING

Certified Ethical Hacker - Ethical Hacking (CEH Version 9)

Training Cisco Certified Network Associate Bug Bounty, Certified MCSA: Windows Server 2012, 2016 - MCITP (Server 2008) , Training Compia A+ (Basics of Computer Hardware) , Compia N+ (Basics of Computer Networking) CCNA (Routing & Switching).

TECHNICAL KNOWLEDGE

Operating System	Windows, Linux, Ubuntu, Kali Linux, Backtrack 5 R3, Parrot OS
Security Monitoring Tools	Splunk (Log analysis & correlation) Security Event Monitoring & Alert Triage Basic Threat Hunting
Network & Traffic Analysis	Wireshark, Tshark Network Miner, Xplico Packet Analysis & Log Correlation
Vulnerability Scanning	Nessus Nmap, Zenmap Netsparker W3af
Incident Response & Forensics	Digital Evidence Collection Data Recovery & Artifact Analysis Root Cause Analysis
Firewalls & Network Security	Cisco ASA 5500 IDS/IPS Monitoring Firewall Log Analysis VPN Configuration
Networking Concepts	TCP/IP, UDP HTTP, HTTPS, SMTP DNS, DHCP, ICMP OSI Model
Windows & Linux Administration	Active Directory Management ,Group Policy Configuration, Patch Management. User Access Control ,Service Hardening , RPM & YUM Package Management
Penetration Testing & Security Tools	Metasploit Framework ,Burp Suite ,Basic Web Application Testing
Database & Server Exposure	MySQL ,SQL ,Server Apache ,Web Server ,PostgreSQL
